Background

Summary

I want to be some one who brings an impact in the software development of the firm. I love to learn new technologies , provide optimal solutions to the problems. I am passionate about software development and its challenges

My goal as a Software Engineer is to design and write excellent quality of code which will improve the performance of the applications of the organizations, I work for. I like to organize things around me: my inbox, my docs, my code and my research. I believe in Usability Matters and stri...
